Today, almost everything you value is on your computer. Your photographs, your music, the passwords and usernames you use to access your bank account, savings, investments, and insurance coverage. So at AVG, we go beyond the protection offered by other security companies. Our promise to you is that we will do everything in our power to prevent anything bad happening to you or your digital identity while you're online.

Our experts are constantly on the lookout for the latest threats, tracking what the bad guys are up to. They are focused on making sure you can surf, shop, chat, work, and play online safely and confidently. You didn't buy your computer to worry about security, and it's our job to make sure that's how things stay.

What makes AVG special

- We're focused on the needs of home and small business computer users
- We keep you safe from identity theft whenever you're online
- We stop the bad guys from getting to your photos, music, and other stuff without getting in your way
- We make sure you don't accidentally visit poisoned web pages

Prevention is better than cure

New AVG 8.5 is the first solution to bring you the multiple layers of security you need in today's online world:

- We stop known and unknown viruses, spyware, and other threats from activating on your computer and stealing your data
- We detect badware hidden in individual web pages at the only time that matters – when you're about to visit that page.

Other anti-virus programs rely on being able to detect all the latest threats – and

- If we find something nasty, we'll deal with it – quietly and efficiently
- We make it easy for you to tailor the security for your particular needs

And if you ever come across something you don't understand, our free online support is just a click away – day or night, no matter where you are.

with tens of thousands of new virus samples arriving in security labs every day, that's simply not feasible. And competing safe-search and safe-surf solutions rely on periodic sweeps of the Internet – which can't keep up with threats that are only present for a day or even just a few hours. Want to know more about exploits? Go to www.avg.com/video

Trial versions of all AVG products are available for download from our website at www.avg.com

Our customers deserve the best

That's why free customer service and support is available online and by email 24 hours a day, seven days a week, for all paid AVG products. Our experts will answer your questions and help you resolve any security or product problems you encounter, and our resellers are trained to deliver the same high quality support, so you're never more than a click away from a solution.

All we ask is that you register your product with us. That way, we can help you quickly and efficiently, so you can get back to using your computer for the reason you acquired it in the first place.

Our software, and our support, is available in multiple languages, so you can feel comfortable knowing that we understand your needs. Current supported languages are:

English, Brazilian Portuguese, Czech, Danish, Dutch, French, German, Hungarian, Italian, Japanese, Polish, Portuguese, Serbian, Slovakian, Spanish.*

*Language support varies according to product and platform.

The latest information about AVG products and prices is always available on our website at www.avg.com. All prices are subject to change.

Awards and Certifications

AVG products consistently achieve Virus Bulletin 100%, ICSA Labs, and WestCoast Labs Checkmark certifications.

80 million users can't be wrong

More than 80 million users around the world are protected by AVG technology. From home users to schools, from non-profits to commercial businesses, we prevent you losing time, money, and disruption by ensuring everyone who uses our software stays safe online.

Our customers are our greatest advocates - here's what some of our users, both home and business users, have been saying online (without any prompting from us)

"AVG is pretty stable and uses little resources"

"I recommend AVG to my clients. It has proven to be pretty good"
"Some colleagues turned me on to AVG, seems good."
"AVG is the best anti-virus software for Windows in my opinion"
"I've been successfully using AVG on Windows 7"
"Someone sent me the Adobe Flash Plugin virus....avoided though, I healed it with AVG."
"AVG is very good. I run it on all my units and it does run very well on Windows 7"
"I got the virus off my server! AVG fixed it. Worth the money"

AVG Internet Security

Comprehensive real-time protection against all types of badware, online threats and identity theft.

Key Technologies

- **New!** Behavior-based protection against new and unknown threats
- **New!** Identity theft prevention ensures personal, private information stays that way
- Integrated protection against the latest viruses, spyware, rootkits, Trojans, worms, and more
- Instant Messaging protection ensures virus infections aren't transferred via chat sessions
- Anti-spam blocks e-mail threats, including phishing attacks, fraud attempts, and other unwanted messages.
- Firewall stops unauthorized third parties from accessing your computer over the Internet
- HTTP scanner screens file and program downloads for malicious content
- Active Surf-Shield provides real-time protection against poisoned web pages, drive-by downloads, and other exploits
- AVG Search-Shield displays just-in-time safety ratings for all search results, including online ads
- System Tools enable advanced operating system monitoring and management

New Identity Protection

AVG Identity Protection delivers real-time, continuous identity protection without slowing your system down. Shop and surf the web, secure in the knowledge that your passwords, account information, credit card numbers, and other personal details are safe from identity thieves, regardless of when you last updated your anti-virus. Traditional security products rely on "signatures" to protect your digital valuables from viruses and spyware, and that's just fine for dealing with existing threats. AVG Identity Protection goes a step further by adding an extra layer of defense that uses advanced behavioral technology to detect and block new and unknown threats as they happen.

Tough on Threats

- Identity protection whenever you go online
- Blocks poisoned web pages in real time
- Detects and removes known and unknown viruses, spyware, rootkits, worms and Trojans
- Protects against invisible attacks by the bad guys while you are surfing the Internet
- Stops spam without blocking the mail you want
- Prevents suspicious files from being opened

Easy on You

- Fast, automatic installation
- Simple set-up and automatic updates
- Works in the background
- Flags suspicious files and web pages
- Free support and updates

System Requirements

AVG Internet Security
Windows 2000/XP SP1, 2 (32/64 bit)/ Vista(32/64 bit)/Vista SP1(32/64bit)
Processor Pentium 1.2GHz, 512 MB RAM, Disk Space 70 MB

AVG Identity Protection

Windows XP SP1, 2 Pro or Home
Processor Pentium III 600 MHz, 256 MB RAM, Disk Space 50 MB
Windows Vista 32-bit
Processor Vista Capable 800 MHz, 512 MB RAM, Disk Space 50 MB
Windows Vista 64-bit
Processor Vista Premium Ready 1 GHz, 1 GB RAM, Disk Space 50 MB

Note: AVG Identity Protection requires Windows XP or Vista; if you run Internet Security on Windows 2000, you will not be able to install AVG Identity Protection

Supported Languages*

English, Brazilian Portuguese, Czech, Danish, German, French, Hungarian, Italian, Japanese, Dutch, Polish, Portuguese, Serbian, Slovakian, Spanish.

*Identity Protection is initially only available and shipped with the English language versions of AVG Internet Security. Check our website for the latest language support on all AVG products.

Licensing

AVG Internet Security requires 1 license per computer and is available in packs of 1, 2, 3, 5 and 10 computers. Licenses can be purchased for 1 or 2 year terms.

AVG Identity Protection

Identity theft prevention and protection against the tens of thousands of new threats that emerge every day

Key Technologies

- Behavior-based protection against new and unknown threats
- Suspicious program activity terminated or quarantined
- Identity theft protection ensures personal, private information stays that way
- Community-based research continuously improves protection
- System Tools enable advanced operating system monitoring and management

New Identity Protection

AVG Identity Protection delivers real-time, continuous identity protection without slowing your system down. Shop and surf the web, secure in the knowledge that your passwords, account information, credit card numbers, and other personal details are safe from identity thieves,

regardless of when you last updated your anti-virus. Traditional security products rely on "signatures" to protect your digital valuables from viruses and spyware, and that's just fine for dealing with existing threats. AVG Identity Protection goes a step further by adding an extra layer of defense that uses advanced behavioral technology to detect and block new and unknown threats.

Tough on Threats

- Identity protection whenever you go online
- Unknown threats blocked before they can do damage
- Prevents rogue applications from executing

Easy on You

- No need for scheduled updates and scans
- Quick and easy to download, install and use
- Compatible with all major security products

System Requirements

Windows XP SP1, 2 Pro or Home

Processor Pentium III 600 MHz, 256 MB RAM, Disk Space 50 MB

Windows Vista 32-bit

Processor Vista Capable 800 MHz, 512 MB RAM, Disk Space 50 MB

Windows Vista 64-bit

Processor Vista Premium Ready 1 GHz, 1 GB RAM, Disk Space 50 MB

Supported Languages*

*Identity Protection is initially only available and shipped with the English language versions of AVG Internet Security. Check our website for the latest language support on all AVG products.

Licensing

AVG Identity Protection requires 1 license per computer and is initially only available as a single-user license for 1 year.

AVG Anti-Virus plus Firewall

When you need more than anti-virus – prevent hacker attacks and block poisoned web pages whenever you go online

Key Technologies

- Stops all known viruses, worms, spyware and other threats
- Prevents accidental infection from poisoned web pages in real time
- Just-in-time safety ratings for all search results, including online ads
- Instant Messaging protection ensures virus infections aren't transferred via chat sessions
- Firewall stops unauthorized third parties from accessing your computer over the Internet
- HTTP scanner screens file and program downloads for malicious content

New Safe Surf and Search

AVG's unique Active Surf-Shield and Search-Shield technologies protect you in real time against malicious web pages and other silent but potentially deadly cyberthreats. Poisoned web pages are infectious for hours, not days, to avoid detection. Other programs rely on static databases and cannot protect you at the only time that matters

– the time you click on a link. When you search using Google, Yahoo, or MSN, if the results include potentially-damaging web pages, AVG simply blocks the page so you can't accidentally infect your system. Other questionable or suspicious sites are flagged with an alert to show you the degree of risk of the page.

Tough on Threats

- Blocks poisoned web pages in real time
- Detects and removes all known malware, no matter where it comes from
- Prevents infections from poisoned web pages – even ones that don't stay around for traditional detection methods
- Blocks hackers from accessing your private files
- Automatically quarantines or removes infections

Easy on You

- Fast, automatic installation
- Simple set-up and automatic updates
- Works in the background
- Flags suspicious files and web pages
- Free support and updates

System Requirements

Windows 2000/XP SP1, 2 (32/64 bit)/ Vista(32/64 bit)/Vista SP1 (32/64bit)
Processor Pentium 600 MHz, 512 MB RAM, Disk Space 30 MB

Supported Languages

English, Brazilian Portuguese, Czech, Danish, German, French, Hungarian, Italian, Japanese, Dutch, Polish, Portuguese, Serbian, Slovakian, Spanish.

Licensing

AVG Anti-Virus plus Firewall requires one license per computer and is available in packs of 1, 2, 3, 5 and 10 computers. Licenses can be purchased for 1 or 2 years.

AVG Anti-Virus

Stay safe online with protection against all known badware and poisoned web pages

Key Technologies

- Stops all known viruses, worms, spyware and other threats
- Prevents accidental infection from poisoned web pages in real time
- Just-in-time safety ratings for all search results, including online ads
- Instant Messaging protection ensures virus infections aren't transferred via chat sessions
- HTTP scanner screens file and program downloads for malicious content

AVG Safe Surf and Search

AVG's unique Active Surf-Shield and Search-Shield technologies protect you in real time against malicious web pages and other silent but potentially deadly cyberthreats. Poisoned web pages are infectious for hours, not days, to avoid detection. Other programs rely on static databases and cannot protect you at the only time that matters

– the time you click on a link. When you search using Google, Yahoo, or MSN, if the results include potentially-damaging web pages, AVG simply blocks the page so you can't accidentally infect your system. Licensing

AVG Anti-Virus requires one license per computer and is available in packs of 1, 2, 3, 5 and 10 computers. Licenses can be purchased for 1 or 2 years.

AVG Internet Security SBS Edition

Centrally-managed total protection for your Microsoft small business network – so you can get on with business

Key Technologies

- Integrated protection against viruses, spyware, rootkits, Trojans, worms, and more to keep your network running
- Anti-spam blocks e-mail threats, including phishing attacks, fraud attempts, and other time-wasting unwanted messages.
- Firewall stops unauthorized third parties from taking control of your computers
- HTTP scanner screens file and program downloads to prevent accidental virus infections
- Active Surf-Shield provides real-time protection against poisoned web pages, drive-by downloads, and other exploits for worry-free Internet browsing
- AVG Search-Shield displays just-in-time safety ratings for all search results, including online ads
- Instant Messaging protection ensures virus infections aren't transferred via chat sessions
- System Tools enable advanced operating system monitoring and management
- Remote Administration for easy deployment and management across the network

AVG Safe Surf and Search

AVG's unique Active Surf-Shield and Search-Shield protects users in real time against malicious web pages, zero day exploits, drive-by downloads and other cyberthreats that can bring down the network and eat into productivity. Other programs rely on static databases and cannot provide protection at the only time that matters – the time users click on a link. When users search using Google, Yahoo, or MSN, if the results include websites that contains malicious code, AVG simply blocks the page so they can't accidentally infect the network. Other questionable or suspicious sites are flagged with an alert to show the degree of risk of the page.

Tough on Threats

- Blocks poisoned web pages in real time – no delays or missed infections
- Detects and removes viruses, spyware, rootkits, worms and Trojans – no malware-induced downtime
- Protects against exploits and drive-by downloads that invisibly and automatically download dangerous content to users' computers – surf the web with confidence
- Prevents suspicious files from being opened – no more accidental infections
- Automatically quarantines or removes infections so they can't spread across the network

Easy on You

- Easy to deploy and manage

- Centralized installation and configuration with full statistical reporting
- Flags suspect search results pages
- Free support, program upgrades and signature updates for the full license duration
- Auto-scheduled scanning and updating

Recommended System Requirements

Windows 2000/XP SP1, 2 (32/64 bit)/ Vista(32/64 bit)/Vista SP1(32/64bit)/ Windows Server 2000/2003/2008/2008x64 Processor Pentium 1.2 GHz, 512 MB RAM, Disk Space 70 MB

Supported Applications

MS Exchange 2000x32/2003x32/2007x64, Kerio

Supported Languages

Workstations: English, Brazilian Portuguese, Czech, Danish, German, French, Hungarian, Italian, Japanese, Dutch, Polish, Portuguese, Serbian, Slovakian, Spanish.

Administrative Console: English, Brazilian Portuguese, Czech, German, French, Italian

Licensing

AVG Internet Security SBS Edition requires 1 license per computer and is available online in packs of 5–200 licenses. For larger installations, contact your local AVG reseller or our sales support team at www.avg.com/support
